

Ray Joseph Alipio

IT Systems Administrator · Endpoint Management · Identity & Access · IT Operations

Laguna, Philippines · Remote with US teams · [linkedin.com/in/ray-joseph-alipio-43853b1b6](https://www.linkedin.com/in/ray-joseph-alipio-43853b1b6) · github.com/rayjoseph16 · rjalipio1025@gmail.com

SUMMARY

IT Systems Administrator with 12+ years in enterprise IT, covering endpoint management, identity and access, SaaS administration and enterprise support. Currently administers Microsoft 365, Entra ID, Intune, Okta, Jamf Pro and Google Workspace for a ~600-person US organization, and owns the employee and device lifecycle end to end, from provisioning through secure wipe. Brings methodical troubleshooting, clear documentation and internal tooling that removes repeat work.

CORE PLATFORMS

Endpoint	Microsoft Intune · Windows Autopilot · Jamf Pro · Jamf Trust · SCCM · Apple ADE · Managed Google Play
Identity	Microsoft Entra ID · Okta · Active Directory · Google Workspace · SSO · MFA · Conditional Access
Security	CrowdStrike · BitLocker · Windows LAPS · Jamf Trust · Device Compliance
SaaS	Microsoft 365 · Google Workspace · Slack Enterprise · Zoom · Jira · 1Password
IT Operations	Onboarding · Offboarding · Asset Management · Access Management · BYOD · Device Recovery · Secure Wipe · ServiceNow · Vanta
Support & infrastructure	Citrix Workspace · GlobalProtect · Pulse Secure · Windows Server · Switches & access points · PowerShell

EXPERIENCE

IT Support / Systems Administrator · DOXA Talent Jan 2025 – Present

Remote · US clients

- Administer enterprise IT platforms supporting approximately 600 employees.
- Manage Microsoft 365, Entra ID, Intune, Google Workspace, Okta, Jamf Pro, Jamf Trust, Slack Enterprise and Zoom.
- Run the endpoint lifecycle from procurement and provisioning through asset recovery and secure wipe.
- Configure and troubleshoot Windows Autopilot and Intune enrollment.
- Manage macOS endpoints through Jamf Pro.
- Deploy and troubleshoot CrowdStrike and Jamf Trust.
- Handle onboarding, offboarding, SSO, MFA, licensing and application access.
- Support Android and iOS in both BYOD and corporate-owned setups.
- Troubleshoot complex endpoint, identity, SaaS and compliance incidents.
- Improve IT operations through documentation, automation and internal tooling.

Level 2 IT Help Desk Support · Wipro Solutions Aug 2021 – Dec 2024

Managed services · US clients

- Resolved escalated incidents and requests in ServiceNow while meeting SLA commitments.
- Troubleshot Microsoft 365, account, hardware, network and enterprise application issues over phone, chat and remote sessions.
- Configured and supported remote access over GlobalProtect and Pulse Secure.

- Deployed software and remediated machines remotely with SCCM; provisioned mobile devices in Intune.
- Supported Citrix Workspace virtual desktops for remote users.
- Improved support documentation and troubleshooting procedures with the wider team.

Assistant Systems Engineer · Tata Consultancy Services

Sep 2018 – Aug 2021

Onsite · semiconductor manufacturing

- Delivered first- and second-line IT support for 300+ onsite users.
- Administered Active Directory, Office 365 accounts, security groups and folder permissions.
- Installed and maintained switches and wireless access points for the site network.
- Deployed and maintained laptops, desktops, printers and network devices.
- Monitored local and global servers and ran scheduled backups.
- Maintained the site's PABX telephony.

IT Help Desk Analyst · Fujitsu Philippines

May 2014 – Aug 2018

Onsite · semiconductor manufacturing

- Provided first-line support for Windows, Microsoft Office, hardware and enterprise applications.
- Administered Active Directory accounts and access.
- Troubleshoot Manufacturing Execution System (MES) issues alongside production teams.
- Ran scheduled server backups for business continuity.

SELECTED PROJECTS

IT Lifecycle Management Platform. One operational view of every employee's IT lifecycle, from the HR request to the returned laptop. Replaced fragmented, manual lifecycle tracking with one view of what's pending, what's overdue, who has which device, and what changed.

Enterprise Endpoint Management. A mixed macOS and Windows fleet, managed to a single standard. New devices arrive configured without hands-on imaging. Compliance is reported by the platform, not assumed.

Identity & Access Lifecycle. Joiner, mover, leaver: access that follows the person and goes away when they do. Because access comes from groups rather than one-off grants, it can be reviewed, and revoking it is complete.

Mobile & BYOD Management. Work data on phones, without taking over people's personal devices. People can use the phone they already carry, and the company can remove its data without touching anything personal.

EDUCATION

BS Information Technology · AMA Computer College, Calamba City, Laguna

2010 – 2014
